

STEM ACTIVITY

Nehemiah

Total Time: 20 minutes
In Class Time: 15 minutes

You will need:

- Toy construction bricks
- Container (for the toy bricks)

STEP 1: Put the toy construction bricks in a container and place it where it can be accessed by all the children in the group. You may wish to use multiple containers for larger groups, or for smaller groups, to divide up the bricks and hand them out to each child.

STEP 2: Gather the children. TEACH: Nehemiah's job was to rebuild the wall around Jerusalem. Let's see if we can build our own wall!

STEP 3: Instruct the children to build their own wall using the toy construction bricks. Like Nehemiah did, make each child (or group of children) responsible for their own section of the wall.

BONUS: For especially mature, good natured children, you could 'assault' them with foam dart guns or pool noodles as they build. If you do...go easy!
