

# STEM ACTIVITY

## Doubting Thomas

Total Time: 15 minutes  
In Class Time: 10 minutes

You will need:

You will need:

- Mirrors
- Flashlight or laser pointer
- Target (included)

**STEP 1: TEACH:** Thomas wouldn't believe Jesus had come back to life unless he saw Jesus for himself. We're going to look at things a little differently, and see if we can stay on target...

**STEP 2:** Have the children watch you place the target somewhere challenging—around a corner or behind some obstacle. Choose a starting point from which to shine a flashlight or laser pointer at the target. (Take care not to let the laser shine in anyone's eyes.)

**STEP 3:** Guide the group in placing the mirrors so that the laser or flashlight's beam will hit it. For an extra challenge, do so with the light source off. Then turn it on to test your aim.

**STEP 4:** Try again with the target in new locations. If you can, use the floor and ceiling!
